Annex to Learning Agreement – Traineeship Programme

Project Title

ErasmusHub – Development of a Web and Mobile Platform for Erasmus Management

Mobility Period

04/03/2026 – 08/05/2026 (8 weeks)

Sending Institution

IES San Juan de la Rambla

Receiving Institution

Gymnázium, Třeboň (Na Sadech 308, Czech Republic)

---

1. Context and Rationale

The receiving institution manages Erasmus+ mobility processes involving application procedures, participant selection, documentation handling, and internal communication. These processes are currently partially manual or fragmented across different tools.

The purpose of this traineeship is to design and develop a structured digital solution to centralise and streamline Erasmus management procedures in alignment with Erasmus+ administrative requirements and good practices in digital governance.

The project will provide students with practical experience in software development within an international professional environment while delivering a functional prototype tailored to the needs of the receiving organisation.

2. General Objective

To design, develop and deliver a functional web and mobile-based platform (or Progressive Web Application) that supports the management of Erasmus mobility processes at the receiving institution.

3. Specific Objectives

The trainees will:

1. Analyse institutional needs and translate them into functional requirements.
2. Design a secure system architecture with role-based access control (RBAC).
3. Develop a Minimum Viable Product (MVP) covering core Erasmus management workflows.
4. Implement modules for:
    - Erasmus opportunities publication and management
    - Student application and selection workflow
    - Personal user area
    - Document management and validation
    - Communication and notifications
5. Apply usability, data integrity and basic security principles.
6. Implement internationalisation and complete Czech localisation of the interface.
7. Produce technical and user documentation.
8. Deliver a final presentation and system handover.

4. Description of Activities and Work Programme (8 Weeks)

Phase 1 – Needs Analysis and Planning (Week 1)

- Kick-off meeting with institutional mentor.
- Review of current Erasmus administrative processes.
- Requirements gathering and prioritisation.
- Definition of user roles and access permissions.
- Creation of a structured product backlog.
- UX wireframes and initial interface prototype.

IES San Juan de la Rambla
C/ Adán Martín Menis
38420 San Juan de la Rambla
Tlf: 922 922 068
email: 38011510@gobiernodecanarias.org
Web: iessanjuandelarambla.org

Deliverables:

- Requirements specification document.
- Approved interface prototype.
- Defined user roles and workflow diagram.

Phase 2 – System Design and Technical Setup (Week 2)

- Definition of technical architecture (frontend, backend, database).
- Database modelling and schema design.
- Setup of development environment and repository.
- Implementation of authentication system.
- Implementation of role-based access control logic.

Deliverables:

- Technical architecture documentation.
- Database schema.
- Functional authentication and role system.

Phase 3 – Core Functional Module Development (Weeks 3–5)

Development of the following modules:

1. Opportunities Management

- Creation, editing and publication of Erasmus opportunities.
- Status control (Draft / Open / Closed).
- Filtering and listing system.

2. Application and Selection Workflow

- Online application form.
- Candidate dashboard.
- Status tracking.
- Basic scoring or rubric system.

3. Personal User Area

- User profile.

IES San Juan de la Rambla
C/ Adán Martín Menis
38420 San Juan de la Rambla
Tlf: 922 922 068
email: 38011510@gobiernodecanarias.org
Web: iessanjuandelarambla.org

- Application status tracking.
- Task/checklist overview.

4. Document Management

- Document upload system.
- Validation and approval workflow.
- Status tracking and comments.

Deliverables:

- Operational MVP with end-to-end workflow.
- Internal testing report.
- Updated project backlog.

Phase 4 – Communication Module and System Refinement (Weeks 6–7)

- Implementation of announcements board.
- Basic notification system.
- Debugging and usability improvements.
- Data validation improvements.
- Security refinement.
- Implementation of internationalisation structure (i18n).
- Full Czech localisation of the interface.

Deliverables:

- Communication module operational.
- Stabilised system.
- Fully translated Czech version.
- Draft user documentation.

Phase 5 – Finalisation, Documentation and Handover (Week 8)

- Final testing and system validation.
- Preparation of deployment environment (local or hosted demo).
- Creation of demo dataset.
- Preparation of technical documentation.

IES San Juan de la Rambla
C/ Adán Martín Menis
38420 San Juan de la Rambla
Tlf: 922 922 068
email: 38011510@gobiernodecanarias.org
Web: iessanjuandelarambla.org

- Preparation of user manual.
- Final presentation to receiving institution.
- Final evaluation meeting.

Deliverables:

- Functional ErasmusHub prototype.
- Complete Czech interface.
- Technical documentation (installation and architecture).
- User manual (for coordinators and participants).
- Source code repository.

5. Expected Learning Outcomes

Upon completion of the traineeship, the participants will be able to:

- Conduct structured requirements analysis.
- Design secure role-based systems.
- Develop full-stack web/mobile applications.
- Implement collaborative development workflows using version control tools.
- Apply testing and debugging methodologies.
- Implement localisation and internationalisation techniques.
- Communicate professionally in an international working environment.

6. Monitoring and Supervision

- Initial kick-off meeting to define scope and expectations.
- Weekly review meetings with institutional mentor.
- Continuous progress tracking via shared project management tools.
- Mid-term evaluation after Week 4.
- Final evaluation meeting and presentation during Week 8.

The receiving organisation will provide technical guidance, feedback, and supervision throughout the mobility period.

Web: iessanjuandelarambla.org

7. Evaluation Criteria

The traineeship will be evaluated based on:

- Completion of planned deliverables.
- Functional correctness of developed modules.
- Quality of system architecture and code structure.
- Usability and role-based access control implementation.
- Quality of documentation.
- Professional conduct and teamwork.
- Final demonstration and handover.
